

Mission

GTMR's OT & E branch plans, integrates, and conducts experiments, developmental testing, independent operational testing, and independent evaluations and assessments to provide essential information to our clients.

The Team

The OT & E team is comprised of Test Engineers and Subject Matter Experts (SME) committed to excellence and continual support of PMA-290/MISD Program Office.

Capabilities

- Operations and Test Support
- Engineering Support
- System Analysis
- Documentation Development
- Modification Development Support
- Sustainment Support

The GTMR team is focused on the opportunity collaborating closely with customers on the Common Chassis Weapon Replacement Assembly research, design, development, test and evaluation.

Our activities encompass capabilities including, control systems, data and communication links, mission sensor packages, weapon integration, interoperability and automation/autonomy, sustainment and the integration and test of new capabilities.

Knowledge Transfer

Post System OT & E Analysis - our Subject Matter Experts provide System Integration, Sustainment and Operator Training to Government Engineers and Systems Analysts. This provides for Knowledge Transfer from Operational Test Analysis and Test Reports and makes for a seamless transition of the systems under evaluation.

Pioneering

GTMR stands at the ready with a full staff supporting future OT & E efforts.

Our success is defined by our ability to meet our customers' needs.
