

Mission

To provide a cadre of mature and highly experienced individuals in the fields of management, technology and logistics.

Areas of Expertise

Engineering Services

The Engineering Team provides complete system design, fabrication and qualification to include specialized integration of SIGINT equipment on both stationary, ground mobile and aviation applications. In addition, GTMR provides Software Engineering to embedded systems, data acquisition, data fusion, geospatial correlation, and specializes in customized Graphic User Interfaces.

Logistics Support

The GTMR Logistics Team has provided inventory and material management support to many customers since 2004. Our services and support ensure that material is available when and where it is needed — and that your maintenance infrastructure meets all mission objectives.

Innovative Interactive Technologies

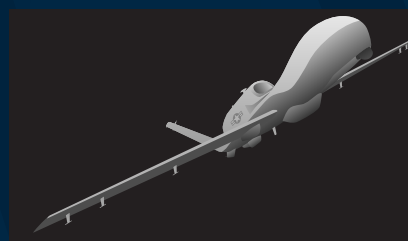

The GTMR Innovative Interactive Technology Team of experienced professional Technical Writers and IETM Developers are fully trained to develop and convert organizational, intermediate, and depot level maintenance and training manuals. Our professionals bring a wealth of experience authoring and developing in a number of formats, including S1000D.

Operational Test & Evaluation

GTMR provides Operational Test & Evaluation (OT&E), and fleet support to the Navy PMA-290E for aircraft and systems testing, even down to component level.

Research & Development

GTMR has vast experience in developing new products and extending existing products with capabilities upgrades for numerous C4ISR customers.

A Complete Solution

The GTMR Team specializes in creating powerful solutions to the most complex engineering and acquisition challenges. Customer service both internal and external drives our planning, decision making processes and use of resources. We take the time to research your service needs and develop a complete design solution to give you control over costs and performance. Once you select the services that fit the need, we work closely with you to guarantee a successful implementation and transition.

Our client-driven approach allows you to customize the services you need from one single source.

Our success is defined by our ability to meet our customers' needs.
